

Pedro F. Franco, D.D.S.

ORAL AND MAXILLOFACIAL SURGERY

Giving back is the underlying theme in everything Dr. Pedro Franco does for his patients and community. In addition to giving his patients beautiful, healthy, functioning smiles and faces, he also gives back to the community who supports him by providing dental services to local schools and serving as a mentor to students who wish to pursue a career in dentistry. He is also a part-time faculty at Texas A&M College of Dentistry and has, for the past 23, years traveled to Colombia and other countries on mission trips to correct cleft lip palate deformities for children with craniofacial syndromes. Dr. Franco is recognized as a pioneer in performing opioid-free surgery. He practices the full scope of oral and maxillofacial surgery with emphasis in avant-garde implant solutions, such as as All-on-4 BiteLock and Trefoil—a Teeth-in-a-Day treatment concept--and efficient and effective restoration using fewer implants for full-mouth rehabilitation with guided navigation surgery and a full digital workflow. He is sought after for his expertise in Zygoma implants, which allows patients with no bone in the upper jaw to have teeth in one day without bone grafting. He has a special interest in TMJ reconstructive and orthognathic surgery, as well as cosmetic surgery and facial trauma. A Diplomate of the American Board of Oral and Maxillofacial Surgery, he lectures internationally on facial reconstruction, dental implants, temporomandibular joint, and orthognathic surgery.

EDUCATION

D.D.S. and Residency, Pontificia Universidad Javeriana School of Dentistry, Bogota, Colombia; Training, Loyola University Medical Center; Fellowship, Baylor University Medical Center
